*Note: the operation procedure above is for EPSON-7series and it can also be applied to other PCB boards. The resetted chip can only display the chip's model, color, and capacity.

3. Notices

- Unismart can only reset the OEM chip, but it cannot change chip data.
- After installing the resetted chip, the printer will display "Non-OEM Information", which doesn't affect the normal use of the chip.
- Differences between the starter cartridge and the standard cartridge.
 KUI series: The label on the starter cartridge showed two different ink volumes, but the standard cartridges just showed the currently used cartridge's ink volume.
 34/35 series: "SETUP" shows under the starter cartridge's model label, but the
